

ASSET MANAGEMENT

Equipment Disposal Data Destruction

Benchmark Technology Group offers a variety of different service solutions tailored to meet the needs of our customers. Our team is committed to exceeding client expectations and maintaining the highest standards of quality, productivity, and customer service.

Benchmark has partnered with experts in the fields of equipment disposal and data destruction. Our Asset Management program takes ownership of equipment at our customers' sites and provides liability protection for the financial institution and its officers.

With Benchmark Technology Group's customized recycling services, we are able to accommodate the specific needs and expectations of our customers. Services include asset tag removal, data and hard disk destruction, degaussing, shredding, and certification of recycling and destruction.

Benchmark and our partners are committed to providing services that not only comply with all state and federal regulations affecting the handling of electronic equipment but assure a level of safety and proper handling that goes well beyond compliance.

Program costs can be tailored by pounds of equipment or per piece of equipment depending upon the volume of equipment that may need to be recycled.

SERVICES OFFERED:

Asset Tag Removal
Data and Hard Disk Destruction
Degaussing and Purging
Shredding
Certificates of Destruction

- All identification markings, such as asset tags, labels, and contact information are removed.
- Comply with the published rules and regulations regarding the disposal of hazardous materials.
- All materials are recycled using environmentally sound practices.
- Liability protection against all environmental, software license infringement, and confidential risks relating to the retirement of technology assets.
- Certificates of Destruction are nationally recognized.

The hard drive degaussing process is in full compliance with all physical destruction criteria as set forth by various laws and regulations, including but not limited to: NIST standards; DoD (Department of Defense) regulations; Bank Secrecy Act; Identity Theft and Assumption Deterrence Act; PCI Data Security Standard; and various state laws.
